IBRAHEM OSAMA HASSAN

Software Engineer — Full-Stack Web, Cloud & Desktop Applications

ibrahem.gebaby@gmail.com +20 103 574 8525 github.com/gebaby-rgb gebaby-rgb.github.io Assiut, Egypt

SUMMARY

Software Engineer (B.Sc. IT, 2026, Very Good) who designs, builds and ships production software end-to-end. Delivered 16 projects for real clients — offline-first desktop ERP/POS systems, multi-role web platforms and bilingual marketing websites — using TypeScript, React, Rust, SQL and serverless cloud (Supabase, Cloudflare Workers/D1). Comfortable owning the full lifecycle: requirements with the client, data modelling, implementation, testing, deployment and support.

TECHNICAL SKILLS

Languages	TypeScript / JavaScript, Rust, SQL, Python, C#, Java, Dart, C/C++
Frontend	React 18/19, Vite, Tailwind CSS, HTML5/CSS3, GSAP, Three.js, Recharts/Chart.js, i18n & RTL
Backend & Cloud	Supabase (Auth, Storage, Realtime, RPC), Cloudflare Workers/Pages, Node.js, REST APIs, RBAC, Google Apps Script, Firebase
Databases	PostgreSQL with Row-Level Security, SQLite (rusqlite), Cloudflare D1, Firestore; schema design & migrations
Desktop & Mobile	Tauri v2 with Rust IPC, Windows installers (offline WebView2), PWA, Flutter
Practices	Git/GitHub, system design, testing & regression suites, SEO, performance, AI-assisted development

EXPERIENCE

Freelance Software Engineer — Present

- Build and deliver custom software for businesses in Egypt and Saudi Arabia: retail ERP/POS, academy and agency management, exam platforms and websites.
- Own each project end-to-end — gathering requirements, designing data models, implementing, testing, deploying and maintaining after launch.
- Ship bilingual (Arabic RTL / English) products used daily by shop staff, teachers, students and agency teams.

SELECTED PROJECTS

El Hamd Store — Mobile Shop ERP & POS — Tauri v2 · Rust · SQLite · React · TypeScript

- 100% offline desktop system shipped as one installer: POS with QR invoices, IMEI-serialized inventory, repair Kanban, cash shifts, installments, suppliers and a profit dashboard (13 modules).
- Rust + embedded SQLite backend with typed IPC, landed-cost allocation, PIN login with roles and a browser mock layer for UI development.

Gebaby v2 — Teachers & Students Platform — React · Supabase · PostgreSQL · RLS · PWA

- Admin / teacher / student portals; one-attempt exam engine enforced in Postgres via RPCs and Row-Level Security; realtime notifications, library, attendance, parent reports, leaderboard and certificates.

Osama Group — Agency ERP & CRM — Cloudflare Workers · D1 · TypeScript · Backblaze B2

- ERP/CRM for a multi-branch marketing agency: 11-role dynamic permissions, 7-stage project workflow, financial dues, attendance, WhatsApp templates; covered by a 396-case regression suite.

Osama Group — Scrollytelling Website (munfalut.com) — JavaScript · GSAP · SEO · PWA

- Live multi-page agency site with a scroll-driven story home page, real pricing packages, PWA support and a 32-article local-SEO blog.

A_A Vision — Interior Finishing Website React 19 · Three.js · GSAP · Lenis · Motion

- Bilingual site with a scroll-synced Three.js build story, finishing-cost estimator, style quiz and booking wizard with WhatsApp handoff.

Aura Academy & Mastoor Textiles — Desktop ERPs Tauri v2 · React 19 · Rust · SQLite

- Offline-first ERPs covering student wallets, attendance, café POS, payroll, cash-shift reconciliation; installment contracts with guarantors and multi-channel cash (Cash, Vodafone Cash, InstaPay).

Al-Fares Al-Moaser — Online Exam Platform JavaScript · Apps Script · Google Sheets · Cloudflare Pages

- Free serverless exam platform: shuffled auto-graded exams, anti-cheat tab/fullscreen detection, scheduled windows and admin logging.

Also delivered: Novera Clean website (live, Saudi Arabia), Vodafone Cash agent ERP, print-shop billing, suit-rental ERP, transport route accounting, Oxygen business portal. Full case studies: gebaby-rgb.github.io

EDUCATION

B.Sc. in Information Technology — New Assiut Technological University 2026

Faculty of Industrial and Energy Technology · Software Engineering Department · Grade: Very Good · Academic projects in applied ML and IoT (ESP32 predictive motor protection; smart-irrigation system with Flutter + Firebase).
